**Process Control & Automation Center To Feature
Latest Technologies At The 2011 CHEM SHOW**

November 1-3 In New York City

WESTPORT, Connecticut... May 4, 2011 – The latest innovations in process control systems, wireless monitoring devices, data collection, instrumentation, sensors, transmitters and much more, will be unveiled during the 2011 CHEM SHOW at the Jacob K. Javits Convention Center in New York City from November 1st through the 3rd.

Dozens of the leading control and automation companies from around the world, including such global leaders as Honeywell and A-T Controls, will be showcasing their latest products and technology solutions to thousands of chemical processing professionals in the Process Control & Automation Center during the three-day exposition and conference. More than 400 exhibiting companies will display their new products and solutions to over 5,000 attendees from over 50 countries throughout the Show floor.

“The Process Control & Automation Center is always one of the most popular and well-visited areas of the Show because it allows CPI professionals to experience first-hand how these new products and systems can increase their companies’ productivity and reduce their costs,” said Clay Stevens, President of International Exposition Company, which produces and manages the CHEM SHOW. “Nearly 27 percent of 2009 attendees surveyed said they were interested in Instruments & Controls.” Stevens added that since the ISA Show and other industry events no longer

exist, the Process Control & Automation Center is the main source of information for many attendees.

Widely recognized as the number one CPI (chemical process industries) event In North America, the CHEM SHOW has been the leading information resource for CPI professionals since 1915. It's a hands-on, interactive event that showcases a wide spectrum of emerging technologies and focuses on such key processing areas as:

- Process Control and Automation Solutions
- Optimizing Process Efficiency
- Water/Wastewater Treatment
- Emerging Technologies
- Saving Energy/Sustainability

In addition to the activity on the Show floor, The American Institute of Chemical Engineers (AIChE) is developing a comprehensive, solutions-focused conference program. The multi-faceted, three-day program will address a wide range of critical industry topics ranging from such new developments as nanotechnology to technical sessions on powder and bulk processing.

About The CHEM SHOW

Since 1915, the CHEM SHOW has been the CPI professional's single best resource for new products, new ideas and new services. It's a hands-on, interactive event that showcases a wide spectrum of emerging technologies. The unique industry forum creates a dynamic marketing environment unequalled by any other process industries event in North America. The CHEM SHOW is produced and managed by International Exposition Company (IEC), 15 Franklin Street, Westport, CT 06880; phone: (203) 221-9232; fax: (203) 221-9260; e-mail: info@chemshow.com; website: www.chemshow.com.
